### Gutekunst Stahlverformung KG - Innovation in Spring and Form Technology

***Individual form springs, flat springs, sheet metal parts, laser parts and wireforms in unlimited variety from Gutekunst Stahlverformung KG. Whether complex forms or multi-purpose properties are called for, in addition to top quality, the company from Pfalzgrafenweiler offers innovative solutions and optimum service from the very beginning.***

The use and design possibilities for form springs, flat springs, sheet metal parts, laser parts and wireforms are as diverse and complex as their manufacture. In addition to precisely-tailored design, they must frequently be tapered with up to five active coils. Gutekunst Stahlverformung KG specialises in jobs of this kind. The company, which was founded in 1990, knows no boundaries in the processing of steel materials up to a thickness of 3.0 mm or 4.0 mm wire diameter, and the subsequent surface finishing. With numerous innovative award-winning solutions and comprehensive modern equipment encompassing CAD/CAM-controlled laser, stamping, creasing, bending and wire eroding machinery, Gutekunst offers an extremely high level of parts precision and repeat accuracy of up to +/- 0.05 mm. The company's own toolmaking shop, the CAD-based job controlling and production management and the "all-in-one" principle with personalised order monitoring ensure fast and optimum throughput for prototypes, small orders and large series. Production is carried out in accordance with job specifications, drawings, samples and CAD data which can be directly transferred to all 2D and 3D formats for layout and production scheduling. On request, the company, which is ISO 9001:2008, 14001 and 18001 certified, provides all necessary test reports, complete process recording and CAD load simulations for every required purpose. In this way, Gutekunst offers the greatest possible flexibility, precision products, the shortest throughput and maximum product safety from the very beginning.

The formula for the success of Gutekunst Stahlverformung KG may sound simple: precision products, innovative solutions, good customer orientation and the most modern production plant. Behind it, however, lie years of constant striving and a never-ending improvement process. The wisdom of the Gutekunst Stahlverformung KG strategy is demonstrated not only by the five successive TOP 100 awards for innovative management but also by satisfied customers worldwide in the sectors automotive engineering, mechanical engineering, aircraft construction, light engineering, medical and electrical engineering.

Get to know Gutekunst Stahlverformung KG personally at MOTEK, the global trade fair for automation - **Hall 1, Stand 1407**. Mr. Gutekunst and his team are looking forward to your visit. To arrange attendance, please get in touch with Ms. Lang / Tel. 07445 8516-17 or Ms. Kienle / Tel. 07445 8516-31 directly, or contact us by e-mail [vertrieb@gutekunst-kg.de](mailto:vertrieb@gutekunst-kg.de).
